Volume 250 1991

Contents

Letters to the Editor

An interstellar refraction model for the rapid radio polarization changes in the quasar 0917+624
Simonetti, J.H. L1

MG1131+0456: discovery of the optical Einstein ring with the NTT
Hammer, F., Le Fèvre, O., Angonin, M.C., Meylan, G., Smette, A., Surdej, J. L5

Cosmology

A determination of the 3-point spatial correlation function for clusters of galaxies
Jing, Y.P., Valdarnini, R. 1

Assemblage of two UVX-QSO samples to $B \sim 19$ in the vicinity of the South Galactic Pole
Campusano, L.E. 9

Scale-invariant models of the galaxy and cluster luminosity functions
Bernardeau, F., Schaeffer, R. 23

Big Bounce in the very early universe
Blome, H.J., Priester, W. 43

Erratum: Against the $\Delta \ln (1+z) \simeq 0.205$ periodicity in quasar redshifts
Scott, D. 291

Dark matter decay, reionization and microwave background anisotropies
Scott, D., Rees, M.J., Sciama, D.W. 295

Extragalactic astronomy

0735+178: the cosmic conspiracy
Bååth, L.B., Zhang, F.J., Chu, H.S. 50

Forbidden high-ionization lines in QSO spectra
Appenzeller, I., Wagner, S.J. 57

Gravitational micro-lensing for large sources
Refsdal, S., Stabell, R. 62

Neutral hydrogen in A 2052 and other cooling flow clusters
Jaffe, W. 67

A statistical analysis of cosmic ray propagation effects on the low frequency radio spectrum of spiral galaxies
Pohl, M., Schlickeiser, R., Hummel, E. 302

(RN) Search for fast ultraviolet variability in NGC 5548 and non-linearities in IUE's SWP camera
Walter, R., Courvoisier, T.J.-L. 312

Erratum: GINGA observation of distant galaxy clusters: temperature and iron abundance of A 2507 and A 483
Arnaud, M., Lachièze-Rey, M., Rothenflug, R., Yamashita, K., Hatsukade, I. 580

Galactic structure and dynamics

A self-regulated state for the interstellar medium: radial dependence in the galactic plane
Parravano, A., Mantilla, Ch.J. 70

Simulations of the effect of spiral arms on the cloud-ensemble velocity dispersion
Thomasson, M., Donner, K.J., Elmegreen, B.G. 316

Stellar clusters and associations

Mass functions of five young Large Magellanic Cloud star clusters
Sagar, R., Richtler, T. 324

Formation, structure and evolution of stars

The period variations of W Ursae Majoris binaries and their relation to magnetic activity
van 't Veer, F. 84

Wavelet analysis of pulsating white dwarfs
Goupil, M.J., Auvergne, M., Baglin, A. 89

The UV variability of the intermediate polars TW Pictoris (H 0534–581) and TX Columbae (1H 0542–407)
Mouchet, M., Bonnet-Bidaud, J.M., Buckley, D.A.H., Tuohy, I.R. 99

Erratum: Infrared and optical CCD images of the young cluster associated with GM 24
Tapia, M., Roth, M., López, J.A., Rubio, M., Persi, P., Ferrari-Toniolo, M. 292

NGC 1866 revisited: semiconvection versus overshoot
Lattanzio, J.C., Vallenari, A., Bertelli, G., Chiosi, C. 340

Comparative study of two type-II OH/IR sources
Le Bertre, T. 351

PU Vulpeculae at the time of spectral change in 1987
Gochermann, J. 361

The discovery of a hot companion to the K-type supergiant HD 4817
Cassatella, A., Smolinski, J. 365

A high galactic latitude survey of far-ultraviolet excess objects
Bixler, J.V., Bowyer, S., Laget, M. 370

EXOSAT observations of the X-ray burst source 4U 1702–42
Oosterbroek, T., Penninx, W., van der Klis, M., van Paradijs, J., Lewin, W.H.G. 389

(RN) Equations of state and bump Cepheids. I. Linear results
Kanbur, S.M. 395

On the DDO absolute magnitudes of K giants
Flynn, C., Mermilliod, J.-C. 400

Lunar occultation and near-infrared speckle observations of DG Tauri, FV Tauri, FW Tauri and GG Tauri
Leinert, C., Haas, M., Richichi, A., Zinnecker, H., Mundt, R. 407

(RN) IRAS observations of stars in the Gliese Catalogue of Nearby Stars
Iyengar, K.V.K., Rengarajan, T.N. 420

Stellar atmospheres

Amplitude variability of τ Pegasi and the nature of singly-periodic δ Scuti stars
Breger, M. 107

Studies of dynamical properties of globular clusters. VI. The high-concentration cluster NGC 6397
Meylan, G., Mayor, M. 113

(RN) Ae and A-type shell stars in the near infrared
Jaschek, M., Andrillat, Y., Jaschek, C. 127

Cosmic rays from magnetically active stellar systems
Vahia, M.N., Rao, A.R., Singh, R.K. 424

SiO maser emission from OH/IR stars close to the galactic centre
Lindqvist, M., Ukita, N., Winnberg, A., Johansson, L.E.B. 431

The nature of the Be binary HR 2142
Waters, L.B.F.M., Coté, J., Pols, O.R. 437

The contribution function for the depth of formation of lines in a stellar atmosphere
Achmad, L., de Jager, C., Nieuwenhuijzen, H. 445

The chemical composition of two K4-type giants, HD 14872 and HD 209960
Krempeć-Krygier, J., Schmidt, M., Turlo, Z. 451

Derivation of stellar integrated flux from photometric indexes
Blackwell, D.E., Petford, A.D. 459

Zeeman-Doppler Imaging of solar-type and Ap stars. IV. Maximum entropy reconstruction of 2D magnetic topologies
Brown, S.F., Donati, J.-F., Rees, D.E., Semel, M. 463

Diffuse matter in space (including HII regions and planetary nebulae)

High resolution CO $J=3$–2 observations of L 1551: fragmentary structure in the outflowing shell
Parker, N.D., White, G.J., Hayashi, S.S., Williams, P.G. 134

Tunnelling out of a molecular cloud edge: free-free continuum toward the W 40 = S 64 cloud
Vallée, J.P., MacLeod, J.M. 143

Interstellar Na I D line studies of stars towards the Draco nebula
Lilienthal, D., Wennmacher, A., Herbstmeier, U., Mebold, U. 150

Abundances of southern Type I planetary nebulae
de Freitas Pacheco, J.A., Maciel, W.J., Costa, R.D.D., Barbuy, B. 159

A spatio-kinematic model for the multiple shell planetary nebula NGC 1535
Banerjee, D.P.K., Anandarao, B.G. 165

Interstellar matter around the Wolf-Rayet star WR 125
Arnal, E.M., Mirabel, I.F. 171

Spectral energy distribution of compact planetary nebulae
Zhang, C.Y., Kwok, S. 179

Radiatively and shock excited H_2 in Magellanic HII regions
Israel, F.P., Koornneef, J. 475

Westerbork observations of high-velocity clouds. Discussion
Wakker, B.P., Schwarz, U.J. 484

Distribution and origin of high-velocity clouds. II. Statistical analysis of the whole-sky survey
Wakker, B.P. 499

Distribution and origin of high-velocity clouds. III. Clouds, complexes and populations
Wakker, B.P., van Woerden, H. 509

CO in the southern planetary nebulae NGC 6072, NGC 6563, and IC 4406
Cox, P., Huggins, P.J., Bachiller, R., Forveille, T. 533

The Sun

Effects of Mg II and Ca II ionization on ab-initio solar chromosphere models
Rammacher, W., Cuntz, M. 212

Two-dimensional models of the solar chromosphere. I. The Ca II K line as a diagnostic: 1.5-D radiative transfer
Solanki, S.K., Steiner, O., Uitenbroeck, H. 220

The 3-min oscillations of the solar chromosphere – a basic physical effect?
Fleck, B., Schmitz, F. 235

Evidence for the interaction of large scale magnetic structures in solar flares
Mandrini, C.H., Démoulin, P., Hénoux, J.C., Machado, M.E. 541

The solar system

Emission cones in Jupiter's hectometric radiation
Barrow, C.H. 245

Semi-analytical theory for the motion of Uranus' satellites
Lazzaro, D. 253

Velocity of individual large dust particles ejected from comet P/Halley
Richter, K., Curdt, W., Keller, H.U. 548

Flow downstream of the heliospheric terminal shock: magnetic field kinematics
Nerney, S., Suess, S.T., Schmahl, E.J. 556

Celestial mechanics and astrometry

A non-deterministic approach to Schmidt plate astrometry
Lattanzi, M.G., Bucciarelli, B. 565

Physical and chemical processes

Charged particle transport in a turbulent magnetized plasma: A reassessment and extension of quasilinear theory
Achatz, U., Steinacker, J., Schlickeiser, R. 266

Instruments, data processing, and computational methods

Adaptive optics on a 3.6-m telescope: results and performance
Rigaut, F., Rousset, G., Kern, P., Fontanella, J.C., Gaffard, J.P., Merkle, F., Léna, P. 280

The chromospheric Lyman α emission of Altair (A 7 IV–V) observed with the IUE
Catalano, S., Marilli, E., Freire Ferrero, R., Gouttebroze, P. 573

Papers accepted for publication in A. & A. 293
